

GW-119 FTTh FTTh indoor cable Stripper

Description

GW-119 is a special tool for stripping the jacket and the strengthening member of a FTTh indoor cable (butterfly lead-in cable). With the developing of the FTTh (Fiber To The home) construction, more FTTh cables are used in the last mile of a FTTh construction. And how to stripping the steel strengthening member off of a FTTh indoor cable has become a big problem. Using a traditionally method to strip the jacket and strengthen member off, the core fiber can be easily damaged and the efficiency is low. To solving the problem described above, the GW-119 FTTh indoor cable stripper comes to us. With the special tool, operator can easily remove both the outer jacket and the strengthening member without damaging the core fibers.

Part Number	Description
STP-OCT-WG-F1-M-03	Special tool for stripping the jacket and the strengthening member of a FTTh indoor cable (butterfly lead-in cable)

Features

- Super tiny design, much more portable
- Designed with Multiple licensed technologies, more professional
- Suitable for both steel and kevlar strengthening member
- Composed with high quality metal blade, more durable
- High precision cable guide hole, special for FTTh indoor cable

Specification

Dimension (mm)	12-*45*25
Weight (kg)	0.15
Handle Material	GW-119n GW-119
Suitable Cable Type	Stainless steel Stainless steel with rubber handle cover
Suitable Strengthening Member	FTTh indoor cable(FTTx butterfly-shape lead-in cable)
Cable guide hole(mm)	Steel & kevlar
	2.5*3.5
